

Dear Andy

Thank you for coming to Pebworth on 15th May , and hopefully you can help resolve some of the issues; we discussed the following

1. consider fitting sealed manhole covers in School Lane so raw sewage does not come up in front of the school
2. Move the manhole further away from Matius's house, and install another non-return valve, and look at raising the area around the manhole cover so it is level with the step
3. Investigate the sink hole in the field which looks like contaminated water from the raising main – and fix it ASAP
4. Look at what can be done if anything with the overflow valve into the ditch/Noleham brook which Matius is saying is not working when the brook is full – put a right-angle bend on the outlet so flap can open
